Probability vs. Predictability

💡 **Probability**

✔ Luck
✔ Little or no strategy involved
✔ How likely will something happen

💡 **Predictability**

✔ Strategy based on past performance
✔ Foreseeable knowledge about outcome
✔ Informed choice

THE MCLWS Mini Sample Guide

The introduction to KREBSoft's complete MCLWS guide "How to Win Big Playing Lotteries SMART"

The most comprehensive and first 21st century winning system based on a study of all the winning combinations from over 100 lotteries worldwide.

Hello and Congratulations

We are pleased to provide for you the opportunity to exponentially leverage the odds toward your favor in playing lottery games.

It is our long-studied belief that you have made a smart choice in wanting to play lottery games with proven knowledge gained from years of research and extensive analysis.

Please see here our "sample-guide" where we are sharing with you a few of the twelve patterns found in all winning combinations in all lotteries.

We have made diligent attempts to present here a credible sampling of the full and complete MCLWS Guide both in a seamless presentation and also simply with excerpts taken directly from the full guide itself.

_____

We have displayed in our advertising the following excitement and we will show you:

How to Win Big Playing the US Lotteries

Based from the fact that now
The Greatest Study of Lotto Games Brings Fantastic New Revelations on How to Win

"Amazing discoveries from 50 years of lotteries research has people all over the world winning big and now you can too!"

So yes, if you have been playing lottery games, and have not been winning **now you can**.

_____

First – just three simple things needed:

Belief
Action
Determination

Belief - is good (positive attitude – self directed thought for success)

Action – sure you must do something.
It is one thing to want a lot of money and another to do something about it - really go for it.

Determination – is so very often the only difference between failure and success. Be determined, stay true to your belief and action and see it all through to your success.

_____

So having now your "Sample-Guide" you've actualized belief, took some action spending a very small amount of time and have taken the first steps to being determined to succeed.

Congratulations!

Now with these qualities what's next in your choice to make great financial success is simply the knowledge and how to use it to win big playing lottery games.

Let's begin

As our headlines say we started studying lotteries and their winning combinations over thirty years ago.

Off and on we had some remarkable success playing some lottery games with a particular system but always thought the system being used was only a part of what could really be a more comprehensive (a better and even much better) system.

Over time programmers were hired but always the deep research required more time, more study, better technology until now in the 2010's, technology is super fast compared to when we started.

With this speed and ability to number crunch and provide amazing statistical data we now have programming providing the Fantastic New Revelations on How to Win.

We looked at what was common to essentially all lottery playing systems and analyzed those things and found what was true and proven. From there we started to build the first and best most comprehensive lottery playing 21st century system.

From this beginning we inputted more than 80 review considerations using this most up to date technology by expert programmers.

_____

ADDITIONALLY we looked at a compilation of lottery facts and lottery myths and began comparing our findings with past research.

The most outstanding (and applicable for being profitable playing lotteries) information was the discovery that there are certain patterns in the winning combinations in all lotteries.

In fact **all lotteries** have the SAME exact patterns in their winning combinations!!!

_____

The next step in the development of your MCLWS Guide was to take the winning patterns and figure out how to apply them in a profit making lottery playing system.

After more than a year and a half of many trials we were theoretically successful in creating a continuously profitable (and easy to use) methodology (system).

_____

Next was to truly test our system.

Our programmers developed the ability for us to practice play fourteen different US lotteries from small pick four numbers games (Montana's Big Sky and Washington state's Match 4) up to pick six numbers lotteries, including for example the Powerball game.

We soon learned that the biggest lotto games and particularly those that require an extra or bonus or lucky ball to win the jackpot were at the time beyond our reach.

Even with proven odds reducing methods (we successfully reduced up to 94% of the odds in the biggest jackpot games), there are simply too many possible combinations to guarantee that we would proof positive be continuously profitable playing the biggest lotto games.[*]

[*]We were also successful in some of the biggest lotto games as the twelve patterns in the winning combinations holds true for every lottery draw game, but not enough to satisfy that the system would necessarily always be profitable when properly applied.

However we also learned in all the lotto games that were a pick four numbers game (Washington and Montana), a pick five numbers game (with up to forty-three numbers in the group or field of numbers to choose from), and the pick six numbers games (with up to forty-nine numbers in the group or field of numbers to choose from) we were very, very successful**!**

We compared our MCLWS playing to simple random playing and were pleased to learn that the chances of winning by playing the MCLWS new way were increased by no less than 6800%!

_____

A last consideration before we share some of the patterns to learn for your successful lottery playing is what are the three practical components for the best big time profitability chances?

They are 100% proven and absolutely the most key considerations for you:

How to win big playing lotteries
What we learned is that winning big is accomplished three ways
1. Knowing how to play to win
2. Knowing when to play to win
3. Knowing what lotteries to play to win.

This is to say what are the patterns in all the winning combinations?
Is there and if so can I learn it, an absolutely proof positive determined predictability to any or all of the patterns?
And what are the best lotteries to play?

The last one you now already know:
Pick four numbers games (Washington and Montana), a pick five numbers game (with up to 43 numbers in the group or field of numbers to choose from), and the pick six numbers games (with up to forty-nine numbers in the group or field of numbers to choose from)

The first two we will begin showing you here in the mini Sample Guide.

_____

Starting with the simplest to see let's continue.

Consecutive Numbers and **Probability** vs. **Predictability**

How often in a pick six numbers from a field of, for example, forty-nine numbers lottery, has the winning combination been comprised of six consecutive numbers?

After all probability (for any given drawing each number (or ping-pong ball) has the same chance of being drawn) says the odds of picking six consecutive numbers is the same as the odds of not picking six consecutive numbers, but what has predictability from our analysis of the 50 years of research, shown?

> In all the lotteries in the U.S and around the world and over a *fifty* year review, a winning combination comprised of six consecutive numbers was **never found**!

In fact a winning combination of five consecutive numbers in it was most extremely rare.
(Four in a row was also most rare)

Yet in one state alone more than ten thousand lottery picks made by lottery players, and this for each drawing, have six consecutive numbers. For example 1, 2, 3, 4, 5, 6.

Probability - equal chance to occur **Predictability -** says it has a 0% history of occurrence

That which is least likely happens least often

4

Note – This consecutive numbers fact holds true the same in a pick-5 lottery game. For example Florida's Fantasy Five game where only once (in over 8,000 drawings!) has there been a winning combination that was five consecutive numbers.

CONCLUSION

When making your play selections (combinations) to place on the play slips avoid playing combinations that have four, five or six consecutive numbers.

*Get beat by the odds (probability) or **play by the odds (predictability**) and **win!***
_____

Pairs

Now knowing the likelihood of any winning combination having four, five or six consecutive numbers is most extremely rare, if ever, what about how often do the winning combinations have two consecutive numbers in them?

We called this determination "**pairs**."

Let's review some more **predictability** by looking at three different lottery games.

Starting with the **Delaware Multi-Win-Lotto** a pick-6 game from a field of 35 numbers for example:

Here are the winning combinations from August 28, 2017 to September 27, 2017.

Note – this game is played on Mondays, Wednesdays and Fridays.

Aug 28	12 20 28 30 31 33
Aug 30	04 07 08 09 21 34
Sept 1	04 07 13 19 26 28
Sept 4	06 08 09 20 22 27
Sept 6	04 07 27 30 32 33
Sept 8	05 06 08 12 16 20
Sept 11	06 08 09 14 18 24
Sept 13	01 03 19 22 24 25
Sept 15	01 18 22 24 28 34
Sept 18	05 13 24 31 32 34
Sept 20	08 12 17 19 27 33
Sept 22	01 05 09 19 28 30
Sept 25	01 02 04 06 23 25
Sept 27	04 10 14 18 19 20

ILLUSTRATION 14

The thing to notice is how often did the winning combination have two consecutive numbers (a "pair") in it?

Aug 28	12 20 28 **30 31** 33	Pair
Aug 30	04 **07 08 09** 21 34	Pair
Sept 1	04 07 13 19 26 28	No Pair
Sept 4	06 **08 09** 20 22 27	Pair
Sept 6	04 07 27 30 **32 33**	Pair
Sept 8	**05 06** 08 12 16 20	Pair
Sept 11	06 **08 09** 14 18 24	Pair
Sept 13	01 03 19 22 **24 25**	Pair
Sept 15	01 18 22 24 28 34	No Pair
Sept 18	05 13 24 **31 32** 34	Pair
Sept 20	08 12 17 19 27 33	No Pair
Sept 22	01 05 09 19 28 30	No Pair
Sept 25	**01 02** 04 06 23 25	Pair
Sept 27	04 10 14 **18 19 20**	Pair

ILLUSTRATION 15

More than **70%** of the time the winning combination contained a "pair."

Never, in this small sample, were there more than two consecutive drawings without there being a pair in the winning combination.

Overall in the **Delaware Multi-Win-Lotto** pairs hit (are in the winning combination), on average, in nearly two out of every three drawings!

*********************   ***************************   ***************************   *** **** *****************

Here is a snapshot of the **Pennsylvania Match 6 Lotto Game** (pick 6 of 49).

These are the winning combinations from February 16, 2017 through June 1, 2017.

They are illustrated here to review frequency of "pairs" hitting in a larger lottery and with a larger sample size. This game at that time was drawn on Mondays and Thursdays.

02/16/2017	**2, 3,** 20, 31, 34, 37	Pair
02/20/2017	**8, 9, 10,** 23, 29, 41	Pair
02/23/2017	20, 25, 32, 37, **39, 40**	Pair
02/27/2017	11, 29, 31, 37, 41, 43	No Pair
03/02/2017	3, 6, 12, 15, 31, 44	No Pair
03/06/2017	7, **22, 23**, 27, 47, 49	Pair
03/09/2017	2, 7, 9, 12, 14, 33	No Pair
03/13/2017	5, 17, **20, 21**, **44, 45**	Pair
03/16/2017	6, 10, 20, **28, 29**, 33	Pair
03/20/2017	17, 19, 21, 25, 37, 41	No Pair
03/23/2017	15, 18, 37, 40, 45, 49	No Pair
03/27/2017	6, 11, **17, 18**, 46, 49	Pair
03/30/2017	**15, 16**, 21, **30, 31**, 34	Pair
04/03/2017	8, **11, 12**, 25, 29, 48	Pair
04/06/2017	2, 9, 11, 19, 32, 39	No Pair
04/10/2017	15, 18, 25, 27, 43, 49	No Pair
04/13/2017	20, **23, 24**, 28, 32, 41	Pair
04/17/2017	10, 16, 21, 28, 41, 44	No Pair
04/20/2017	14, 31, **34, 35**, 37, 44	Pair
04/24/2017	5, **10, 11**, 35, 37, 40	Pair
04/27/2017	2, 7, 14, 17, 28, 46	No Pair
05/01/2017	1, 7, **18, 19**, 21, 30	Pair
05/08/2017	8, 11, 16, 36, 38, 44	No Pair
05/11/2017	10, 14, 25, **29, 30**, 46	Pair
05/15/2017	2, **4, 5,** 21, 23, 30	Pair
05/18/2017	12, 13,26, 27, 28, 46	Pair
05/22/2017	12, 18, 25, 39, **43, 44**	Pair
05/25/2017	**10, 11, 12**, 17, 26, 43	Pair
05/29/2017	4, **14, 15**, 28, 32, 42	Pair
06/01/2017	**16, 17, 18**, 25, 32, 33	Pair

More recently and now as a daily game the winning combinations from 10/17/19 to 12/1/19 had a pair in the winning combination 24 times in those 46 drawings.

24/46 = 52.17%

https://www.palottery.state.pa.us/Games/Winning-Numbers-History.aspx

ILLUSTRATION 16

In 20 of 30 drawings, a pair hit. This is equal to 66.7%, two out of every three drawings.

In the **Pennsylvania Match 6 Lotto Game** pairs hit on average in more than half of the drawings!

*********************   ***************************   ***************************   *** **** *****************

Here is a snapshot of a pick-5 lottery, the **Florida Fantasy Five Game** (pick 5 of 36). These are the winning combinations from September 10, 2018 to October 14, 2018.

Florida's Fantasy Five 5/36

9/10/2018	3,10,25,**30,31**	Pair
9/11/2018	4,**7,8**,13,15	Pair
9/12/2018	**14,15**,22,29,36	Pair
9/13/2018	1,3,9,17,29	No Pair
9/14/2018	8,15,19,21,26	No Pair
9/15/2018	**4,5**,8,13,30	Pair
9/16/2018	10,14,21,26,35	No Pair
9/17/2018	1,7,24,32,35	No Pair
9/18/2018	3,6,18,23,27	No Pair
9/19/2018	5,**17,18**,23,25	Pair
9/20/2018	1,6,25,**35,36**	Pair
9/21/2018	2,5,16,27,36	No Pair
9/22/2018	2,**5,6**,13,17	Pair
9/23/2018	6,19,22,24,30	No Pair
9/24/2018	1,8,13,26,30	No Pair
9/25/2018	8,**17,18**,23,36	Pair
9/26/2018	2,7,22,**29,30**	Pair
9/27/2018	9,12,24,30,33	No Pair
9/28/2018	7,**23,24**,28,35	Pair
9/29/2018	1,**12,13,14**,33	Pair
9/30/2018	10,12,16,20,36	No Pair
10/01/2018	1,5,20,**24,25**	Pair
10/02/2018	7,14,19,23,31	No Pair
10/03/2018	4,6,15,29,31	No Pair
10/04/2018	11,14,18,20,35	No Pair
10/05/2018	1,**15,16**,19,24	Pair
10/06/2018	2,8,12,18,28	No Pair
10/07/2018	21,23,25,26,31	No Pair
10/08/2018	9,20,22,**33,34**	Pair
10/09/2018	3,6,12,17,29	No Pair
10/10/2018	6,21,24,33,36	No Pair
10/11/2018	**2,3**,11,20,31	Pair
10/12/2018	**8,9**,28,31,35	Pair
10/13/2018	8,**22,23**,30,33	Pair
10/14/2018	**9,10**,12,13,35	Pair

ILLUSTRATION 17

In 18 of 35 drawings, a pair hit. This is equal to 51%.

More on Pairs
The pairs' indicator consideration is recommended to be used in accordance to the lottery game you are playing.

For Pick-6 games, for example the Delaware Multi-Win Lotto (a pick 6 of 35) pairs will hit more often – considerably higher than more than half the time. As exampled pairs hit in 71% of the drawings.

Again in Delaware's Multi-Win Lotto game pairs hit in nearly two out of every three drawings.

In Pennsylvania's Match 6 Lotto Game and in New Jersey's Pick-6 game (both 6/49 games) pairs hit on average in *more than half* of the drawings.

In the pick-5 lottery games including Florida's Fantasy Five game, Virginia's Cash 5 game, Idaho's (pick 5 of 32), Wisconsin's Badger 5, in Pennsylvania's Treasure Hunt game and in essentially all pick-5 draw games (up to 43 numbers in its numbers to choose from) a pair hits, on overall average, in one out of every two drawings!

For Pick-4 games, for example Washington's Match 4 (pick 4 of 24), and Montana's Big Sky Game (pick 4 of 28), pairs hit on average a noticeably under half of the time, but still often enough that they need to be considered.

CONCLUSION

When making your play selections (combinations) to place on the play slips remember that a pair needs always to be considered.

If for example you are playing ten combinations the recommendation (depending on your state's statistical average) is to make sure that perhaps five or six of your combinations have a pair in them.

Get beat by the odds (probability) or **play by the odds (predictability)** *and* **win!**

_____

More Predictability

Let's review some snapshots of various games from pick-6, pick-5 and pick-4 lottery examples and consider "repeats."

Repeats are those numbers, four (in a pick-4 game), five (in a pick-5 game) or six (in a pick-6 game) that made up (were in) the last drawing's winning combination.

For example in the Pennsylvania Match 6 Lotto game:

NOTE again up until 08/29/2017, this game was not a daily played game, but played (drawn) only on Mondays and Thursday. So the consecutive drawing following the 2/23/2017 drawing was the 2/27/2017 drawing.

02/23/2017	20, 25, 32, **37**, 39, 40
02/27/2017	11, 29, 31, **37**, 41, 43

ILLUSTRATION 19

The number 37 hit on the 2/23/17 drawing and hit again on the next drawing on 2/27/17.

Again: for the Florida Fantasy Five game on July 26, 2017 the number 35 hit and on the next drawing July 27, 2017 35 hit again.

07/26/2017	1-11-22-**35**-36
07/27/2017	14-15-32-33-**35**

ILLUSTRATION 20

These are illustrations showing a repeat hitting.

Starting again with the **Delaware Multi-Win-Lotto** a pick-6 game from a field of 35 numbers

Delaware Multi-Win-Lotto 6/35

Aug 28	12 20 28 30 31 33	No Repeat*
Aug 30	04 07 08 09 21 34	No Repeat
Sept 1	**04 07** 13 19 26 28	Repeat
Sept 4	06 08 09 20 22 27	No Repeat
Sept 6	04 07 **27** 30 32 33	Repeat
Sept 8	05 06 08 12 16 20	No Repeat
Sept 11	**06 08** 09 14 18 24	Repeat
Sept 13	01 03 19 22 **24** 25	Repeat
Sept 15	01 18 **22 24** 28 34	Repeat
Sept 18	05 13 24 31 32 **34**	Repeat
Sept 20	08 12 17 19 27 33	No Repeat
Sept 22	01 05 09 **19** 28 30	Repeat
Sept 25	**01** 02 04 06 23 25	Repeat
Sept 27	**04** 10 14 18 19 20	Repeat

ILLUSTRATION 21

* The winning combination on Aug 25, 2017 (the previous drawing) was 01 09 16 17 29 35, so there was then no repeat number in the winning combination on the August 28 drawing.

9 out of 14 times a number (or numbers) from the previous drawing's winning combination was also one of the numbers in the next drawing's winning combination.

So in the example here a "repeat" hit much greater than half of the time at 64.2% and three of those times two repeats hit. (*Also note in 10 of the 14 drawings (71%) a "pair" hit….*)

In Delaware's Multi-Win Lotto game **repeat(s)** hit in **more than two out of every three** (67.7%) **drawings**

**********************   **************************   **************************   *** **** *****************

Pennsylvania Match 6 Lotto Game 6/49 – These are the winning combinations from February 16, 2017 through June 1, 2017.

They are illustrated here to review frequency of "repeats" in a larger lottery and with a larger sample size.

Again this game was at that time drawn on Mondays and Thursdays.

02/16/2017	2, 3, 20, **31**, 34, 37	Repeat *
02/20/2017	8, 9, 10, 23, 29, 41	No Repeat
02/23/2017	20, 25, 32, 37, 39, 40	No Repeat
02/27/2017	11, 29, 31, **37**, 41, 43	Repeat
03/02/2017	3, 6, 12, 15, 31, 44	No Repeat
03/06/2017	7, 22, 23, 27, 47, 49	No Repeat
03/09/2017	2, **7**, 9, 12, 14, 33	Repeat
03/13/2017	5, 17, 20, 21, 44, 45	No Repeat
03/16/2017	6, 10, **20**, 28, 29, 33	Repeat
03/20/2017	17, 19, 21, 25, 37, 41	No Repeat
03/23/2017	15, 18, **37**, 40, 45, 49	Repeat
03/27/2017	6, 11, 17, 18, 46, **49**	Repeat
03/30/2017	15, 16, 21, 30, 31, 34	No Repeat
04/03/2017	8, 11, 12, 25, 29, 48	No Repeat
04/06/2017	2, 9, **11**, 19, 32, 39	Repeat
04/10/2017	15, 18, 25, 27, 43, 49	No Repeat
04/13/2017	20, 23, 24, 28, 32, 41	No Repeat
04/17/2017	10, 16, 21, **28**, **41**, 44	Repeat
04/20/2017	14, 31, 34, 35, 37, **44**	Repeat
04/24/2017	5, 10, 11, **35**, **37**, 40	Repeat
04/27/2017	2, 7, 14, 17, 28, 46	No Repeat
05/01/2017	1, **7**, 18, 19, 21, 30	Repeat
05/08/2017	8, 11, 16, 36, 38, 44	No Repeat
05/11/2017	10, 14, 25, 29, 30, 46	No Repeat
05/15/2017	2, 4, 5, 21, 23, **30**	Repeat
05/18/2017	12, 13,26, 27, 28, 46	No Repeat
05/22/2017	**12**, 18, 25, 39, 43, 44	Repeat
05/25/2017	10, 11, **12**, 17, 26, **43**	Repeat
05/29/2017	4, 14, 15, 28, 32, 42	No Repeat
06/01/2017	16, 17, 18, 25, **32**, 33	Repeat

More recently - the winning combinations from 10/17/19 to 12/1/19 had a repeat in the winning combination 25 times in those 46 drawings.

25/46 = 62.5%

https://www.palottery.state.pa.us/Games/Winning-Numbers-History.aspx

Illustration 22

* The winning combination on February 13, 2017 (the previous drawing) was 01 04 05 06 31 41, so there was then a repeat number in the winning combination on the February 16 drawing.

Even with a bigger lottery game (up from 35 to 49 numbers in the field of numbers) a repeat hit in 15 of the 30 exampled drawings, equal to 50% of the time and three times two repeats hit.

In **Pennsylvania's Match 6 Lotto Game repeat(s) hit** on average at **56.8%** (more than half of the time).

*********************   **************************   ****************************   *** **** *****************

Now let's look at repeats and a pick-5 game.

Florida's Fantasy Five 5/36

Date	Numbers	Repeat
9/10/2018	3,10,25,**30**,31	Repeat
9/11/2018	4,7,8,13,15	No Repeat
9/12/2018	14,**15**,22,29,36	Repeat
9/13/2018	1,3,9,17,**29**	Repeat
9/14/2018	8,15,19,21,26	No Repeat
9/15/2018	4,5,**8**,13,30	Repeat
9/16/2018	10,14,21,26,35	No Repeat
9/17/2018	1,7,24,32,**35**	Repeat
9/18/2018	3,6,18,23,27	No Repeat
9/19/2018	5,17,**18,23**,25	Repeat
9/20/2018	1,6,**25**,35,36	Repeat
9/21/2018	2,5,16,27,**36**	Repeat
9/22/2018	2,**5**,6,13,17	Repeat
9/23/2018	**6**,19,22,24,30	Repeat
9/24/2018	1,8,13,26,**30**	Repeat
9/25/2018	**8**,17,18,23,36	Repeat
9/26/2018	2,7,22,29,30	No Repeat
9/27/2018	9,12,24,**30**,33	Repeat
9/28/2018	7,23,**24**,28,35	Repeat
9/29/2018	1,12,13,14,33	No Repeat
9/30/2018	10,**12**,16,20,36	Repeat
10/01/2018	1,5,**20**,24,25	Repeat
10/02/2018	7,14,19,23,31	No Repeat
10/03/2018	4,6,15,29,**31**	Repeat
10/04/2018	11,14,18,20,35	No Repeat
10/05/2018	1,15,16,19,24	No Repeat
10/06/2018	2,8,12,18,28	No Repeat
10/07/2018	21,23,25,26,31	No Repeat
10/08/2018	9,20,22,33,34	No Repeat
10/09/2018	3,6,12,17,29	No Repeat
10/10/2018	**6**,21,24,33,36	Repeat
10/11/2018	2,3,11,20,31	No Repeat
10/12/2018	8,9,28,**31**,35	Repeat
10/13/2018	**8**,22,23,30,33	Repeat
10/14/2018	9,10,12,13,35	No Repeat

ILLUSTRATION 23

*On 9/9/2018 the winning combination was 1,2,12,27,30. Therefore the number 30 is a repeat on the 9/10/2018 drawing.

A repeat hit in 20 of the 35 exampled drawings, equal to 57% of the time.

In the **Florida's Fantasy Five 5/36** lottery game **repeats hit** on average **in more than half** (56.12**%**) of all drawings.

*********************   **************************   *************************   *** **** ****************

CONCLUSION

Repeats happen often. When making your play selections (combinations) to place on the play slips remember that a repeat needs to be considered.

*Get beat by the odds (probability) or **play by the odds** (predictability) and **win!***

More Predictability

Let's review the same examples one more time and consider "crosses."

Cross Numbers (separate from and in addition to any other designation*) are those numbers that immediately precede and immediately follow each of the numbers in the previous drawing's winning combination.

Again **Delaware's Multi-Win-Lotto** exampled:

Previous drawing's (August 25, 2017) winning combination was 01 09 16 17 29 35.

Aug 28	12 20 28 **30** 31 33
Aug 30	04 07 08 09 **21 34**
Sept 1	04 **07** 13 19 26 28
Sept 4	**06 08** 09 **20** 22 **27**
Sept 6	04 **07** 27 30 32 33
Sept 8	**05 06 08** 12 16 20
Sept 11	06 08 **09** 14 18 24
Sept 13	01 03 19 22 24 **25**
Sept 15	01 **18** 22 **24** 28 34
Sept 18	05 13 24 31 32 34
Sept 20	08 **12** 17 19 27 **33**
Sept 22	01 05 **09** 19 **28** 30
Sept 25	01 02 **04 06** 23 25
Sept 27	04 10 14 18 19 20

ILLUSTRATION 25

Why the numbers in bold and of what significance are they?

> First notice that in the winning combinations listed in 12 of the 14 there is a number or numbers bolded. So 85% of the time (drawings) there is a bolded number or numbers.

Each bolded number is a "**cross number**."

NOTE – this is a constant – meaning regardless of the lottery game being played (a pick-4, pick-5, or pick-6), "cross numbers" are those numbers that immediately precede and immediately follow each of the numbers in the previous drawing's winning combination.

Example – on August 25, 2017 the winning combination in Delaware's Multi-Win-Lotto was 01 09 16 17 29 35.

Therefore the cross numbers or "crosses" for the next drawing are 2, 8, 10, 15, 16, 17, 18, 28, 30, and 34. (As this game is a pick 6 of 35 numbers there is no number 36 in this lottery game).

> *NOTE – so yes any number can have multiple designations – meaning any number could be for example a repeat and a cross. Here is such an example from Florida's Fantasy Five game
>
> | 9/22/2018 | 2,5,6,13,17 |
> |-----------|-----------------|
> | 9/232018 | 6,19,22,24,30 |
>
> With its hitting on 9/22/18 and 9/23/18 the number 6 is a repeat and because it immediately follows the previous drawing's number 5, its hitting on 9/23/18 is also a cross number hit.

What is the significance of a cross number or numbers?

Consider that in the example here (Illustration 25) 22 cross numbers hit in these 14 drawings equaling more than 1.5 cross numbers hitting per drawing!

Delaware's Multi-Win Lotto game has **cross numbers hit** on average in over **90%** of the drawings.

**********************   *************************   *************************   *** **** *****************

Here is another snapshot example regarding crosses again using the bigger **Pennsylvania's Match-6 Lotto**

Note that the winning combination on 2/13/17 (the previous drawing to the 2/16/17 drawing) was 1, 4, 5, 6, 31, 41

02/16/2017	**2**, **3**, 20, 31, 34, 37
02/20/2017	8, 9, 10, 23, 29, 41
02/23/2017	20, 25, 32, 37, 39, **40**
02/27/2017	11, 29, **31**, 37, **41**, 43
03/02/2017	3, 6, **12**, 15, 31, **44**
03/06/2017	**7**, 22, 23, 27, 47, 49
03/09/2017	2, 7, 9, 12, 14, 33
03/13/2017	5, 17, 20, 21, 44, 45
03/16/2017	**6**, 10, 20, 28, 29, 33
03/20/2017	17, **19**, **21**, 25, 37, 41
03/23/2017	15, **18**, 37, **40**, 45, 49
03/27/2017	6, 11, **17**, 18, **46**, 49
03/30/2017	15, **16**, 21, 30, 31, 34
04/03/2017	8, 11, 12, 25, **29**, 48
04/06/2017	2, **9**, **11**, 19, 32, 39
04/10/2017	15, **18,** 25, 27, 43, 49
04/13/2017	20, 23, **24**, **28**, 32, 41
04/17/2017	10, 16, **21**, 28, 41, 44
04/20/2017	14, 31, 34, 35, 37, 44
04/24/2017	5, 10, 11, **35**, 37, 40
04/27/2017	2, 7, 14, 17, 28, 46
05/01/2017	**1**, 7, **18**, 19, 21, 30
05/08/2017	**8**, 11, 16, 36, 38, 44
05/11/2017	10, 14, 25, 29, 30, 46
05/15/2017	2, 4, 5, 21, 23, **30**
05/18/2017	12, 13, 26, 27, 28, 46
05/22/2017	**12**, 18, **25**, 39, 43, 44
05/25/2017	10, 11, 12, **17**, **26**, **43**
05/29/2017	4, 14, 15, 28, 32, **42**
06/01/2017	**16**, 17, 18, 25, 32, **33**
06/05/2017	3, 4, **15**, 25, 36, 38
06/08/2017	17, 20, 30, 33, 42, 47

ILLUSTRATION 26

A cross number hit in 24 of the 32 drawings equal to **75%** of the drawings.
So in three out of every four drawings a cross number or numbers hit.

Consider that in the example here (Illustration 26) 37 cross numbers hit in these 32 drawings equaling more than 1.15 cross numbers hitting per drawing!

And in this example never more than two consecutive drawings occurred without a cross number hitting.

Pennsylvania's Match-6 Lotto game has **one or more cross numbers hit** on average **in over four out of every five drawings.**

CONCLUSION

Cross numbers are in the winning combinations in all of our recommended to play lotteries at a very high rate. When making your play selections (combinations) to place on the play slips you should always consider the cross numbers.

Get beat by the odds (probability) or **play by the odds** *(predictability) and* **win!**

_____

More Predictability

All lotteries have a bell curve based on the sum of the numbers in their winning combinations where the winning combination in four out of every five drawings will fall.

For example – a pick-5 game's winning combination might be:
6,11,19,23, 24.

The sum of this winning combination is 6+11=17+19=36+23=59+24= 83.

We call the sums or bell curve where 80% (four out of every five drawings) falls, the "range." Meaning that the sum of the winning combination will be in the "range" of, for example Florida's Fantasy Five game, between 64 and 121 in four out of every five drawings.

Range – Of all possible combinations as defined by the lottery specifics, "Range" is the upper and lower window "sweet-spot" of combinations as defined by the sums of their component numbers.

For example, and again, in Florida's Fantasy Five game, statistically in no less than 80% of its drawings, the sum of the five numbers in the winning combination will be between 64 and 121. This 64 to 121 is that lottery's "range."

CONCLUSION

This range can be used to significantly help make your best "favorable odds increasing" play selections.

Let's say in making your selections (combinations) to play – and again we will use for illustrative purposes the Florida Fantasy Five game - you have selected two cross numbers, and a repeat number and then selected a fourth number that makes a pair.

Now when adding the fifth and final number, select a number that when adding it to the sum of the four numbers already selected, makes the sum of the five numbers greater than 63 and less than 122.

Get beat by the odds (probability) or **play by the odds** *(predictability) and* **win!**

The Mini-Sample-Guide

So far you learned the basics regarding consecutive numbers and the first lessons regarding probability versus predictability.

You have also learned the basics regarding pairs and their frequency of hitting (how often they are found in the winning combinations) and repeats and their frequency of hitting, and cross numbers and the high number of hits they have in the winning combinations.

You have also discovered range and how it works with 100% accuracy in four out of every five drawings in all lotteries.

With providing just a small sampling here we look forward to sharing with you all of the amazing and absolutely proven, and new discoveries, from the greatest study ever of lottery games based on reviewing all the winning combinations from the lotteries in the U.S and around the world over a fifty year period.

It is our pleasure to provide for you going forward the most complete lottery winning system ever.

Looking forward

Still to come for you in the full complete **MCLWS Guide** are the **enhanced predictability factors** regarding these sample patterns touched on here in the mini-guide and the **critical seven more patterns** discoveries, and **the amazing frequency of hits calculating** that removes up to 90+% of the odds in whatever lottery game you are playing, and much more, **including** the **Range** for each of the 40+* lottery games we recommend**!**

Please know the frequency of hits calculating is the foundation of the most successful lottery playing system guide. It is 100% absolutely proven and works for every lottery game and most effectively in all of our (40+) recommended lottery games.

So before you make your combinations to play selections, up to 90+% of all possible combinations in the lottery you are playing can be eliminated. These eliminated combinations are those that are proven absolutely 100% to have the least possible chance of winning.

Remember based on the results of the 50 year study, for each drawing and no matter what the lottery game, there are a certain (high percentage) of combinations that have only a 0.001% to 6.3% chance to be the winning combination.

Therefore – now using **your twelve patterns** information you make your play selections from only those 9% -10% of the combinations that will have the winning combination more than 93% of the time !!!

So you can win big (and often) with the MCLWS Guide with all of this and more!

Buy now and you'll also receive:

- The MCLWS Terminology Glossary – simple easily understood definitions of all lottery terms and words
- Our special sections regarding Making Your Playing Selections and All About Probability / Predictability
- And All about hot numbers, cold numbers, frequency of winning numbers – all explained accurately, scientifically, absolutely and 100% proven!
- Our exclusive discussion about how to include Your Favorite Numbers when making your selections (combinations) to play
- Our conclusive summary regarding Predictability –including Best times to play and Tracking results for winning combinations
- A dedicated chapter devoted to Considering Your Playing To Leverage Your Best Advantage at all times
- Proprietary Analytical and Strategic tips
- Advanced Playing strategies including pooling and wheeling information
- Winnings – Lump sum or Annuity information
- And links to all the states' lottery games

And more!

A complete 71 pages including 64 illustrations!!

Remember:
In wanting to share the wealth possibilities more so than make a "quick buck" your **MCLWS Guide**, the most comprehensive and the first truly 21st century lotteries winning program ever, is available at this time at the introductory price of *only* **$29!**   (Regular price of $249 after this introductory phase)

Yes, for about the price of one haircut or one modest diner out you can now win big (and continuously) playing lotteries.

Why spend your money on the smallest chance of winning when with just a very minimal investment you can increase your chances of winning by 6,800%?

Enjoy your guide and enjoy your winnings!

* There is a lottery game that we recommend in nearly every state. The only states that at this time that do not have a recommended lottery game are Alabama, Alaska, Hawaii, Illinois, Iowa, Kentucky, Nevada, New Hampshire, North Dakota, Puerto Rico, Tennessee, Utah, and Wyoming.

Also note that some states have more than one recommended lottery game.

100% money back guarantee - if you find (and we ask please that you might show proof) that we are wrong about the patterns and frequency of hits information, this is to say the information in your MCLWS Guide, we will and without delay return your $29 and without any handling, restocking etc. charges.

For more information and how to buy the MCLWS Guide please email us at info@krebsoftinc.com

Inquiries can be sent to info@krebsoftinc.com
We welcome your success stories, questions, and anything you'd like to share with us.
